

Case: Back pain 65 year old Male

The Person & Complaint

This man presented with pain in his back and couldn't stand up straight he was in so much pain.

The Story & Emotions

The client recently injured his back while working in the garden.

When he was a child he was playing on some storm water pipes and fell and injured his back very badly. He went home but he felt unable to tell his mother, as he knew he would be in trouble.

The Energetic System

- Hod is blocked
- Bladder meridian is blocked.
- Yesod and Chesed are blocked

Treatment – first session

I opened Hod and then spent most of the time opening the bladder meridian as he told this story of his childhood, which he said he had never spoken of before. His back improved. He could finally stand up straight and walk.

- Opened Hod
- Opened Bladder meridian from BI 67 blb.

Result/ How it was resolved

After the treatments concluded, the client could walk with ease and stood up straight. His pain had decreased to some 2 out of 10 (initially 10 out of 10).

Interestingly though he still did not believe in the treatment. He returned to having physiotherapy for the remaining discomfort.

What did I learn?

Even though the evidence is there some people's thinking is very rigid. This client had had electric shock treatment and did not trust any type of 'talking therapy', which was how he classified AcuEnergetics. Even though he was almost out of pain, could walk, stand up straight and the story released he did not trust.
