

Case 15:a) Dizziness for three days

b) Acute dizziness and nausea/vomiting feeling

a)The person and complaint

A Filipino lady in early 50s presented with dizziness for three days . She was on blood pressure medication and thought it was caused by her blood pressure. She asked to check her blood pressure and was found to be normal 117/82 pulse 68. She was puzzled with her dizziness.

The story and emotions

She had been suffering fear from family issues in the last few days and had sleepless nights . She was also stressed and anxious.

The Energetic system

Her kidney gate is blocked through fear and stress. Too much was in her head and She was ungrounded.

Treatment

Ten minutes of resonance on her kidney gate K1 bilaterally on until they both pulse coherently relieved her dizziness immediately. She was surprised how simple the treatment is and was very pleased with the treatment. She was advised also to massage her K1 point at night in circular clockwise motion before bedtime to help her sleep better and calm her system down.

b)The person and complaint

A young teenage girl walked into the practice and asked for help. She suffered acute dizziness, nausea and vomiting feeling all of a sudden . Her face looked pale and drained.

The story and emotion

She has been rushing to finish off her work the whole morning as instructed by her supervisor. She was under stressful pressure and did not drink or had a break since She worked up in the morning after a sleepless night of stress in her mind. She asked for some drugs to be given to help her symptoms.

The energetic System

Her kidney gate was also blocked and was very contracted as it felt achy , heavy and prickly. There was no movement on her kidney gate .

Treatment

Resonance was done on her K1 bilaterally on and off immediately. It took 15-20 minutes to get her K1 responding As soon as her K1 opened, she felt relieved immediately and her face colour returned to normal . She felt calm too and was so thankful for the treatment.
