

Case 11: [colic & indigestion] 6 week-old baby boy

The Person & Complaint

Suffering from colic and indigestion. Unable to sleep for more than 1hr at a time, crying heavily and appears to be very bloated. Breast feeding is also difficult.

The Story & Emotions

Treated mother through her pregnancy and birth went very well. Completely natural delivery within 4hrs.

The Energetic System

Some disturbance in the heart and weakness in the lower triangle (malkuth, hod and netzach).

Treatment – first session

- Opened shen tao to malkuth (baby was restless to begin with but settled down)
- Malkuth to hod and malkuth to netzach (kidneys relaxed nicely and baby went into a deep sleep).
- Then opened hod to netzach (a lot of gas released from the tummy)

Result/ How it was resolved

After session mum noticed an immediate difference. Baby slept much more deeply and for over 4hrs consistently which was a first. Breast feeding was also much more comfortable.
