

Case 13

BJ age 41 Fertility

Came to see me about 18 months ago for infertility she had been trying for a year

to fall pregnant

She had full usual investigations and there was no problem with her hormone levels or any other related systems

She had no relationship problems that she was aware of, and was happy with her partner who also was keen to have a child. However she was under a lot of pressure from herself to have children whilst it was still possible!

When she talked to me about her relationship it became apparent to me that she likes to be in full control of her life herself and her partner she finds it very important! Her Personality showing a tendency to over control!

Also very deep seated religious disposition about what is right!

I treated her three times on each session I treated Geburah to the back of the heart. Binah to back of heart and Yesod to each ovary, Yesod to base!

Second session I also opened both wrist gates P6 and TH 5 and SP 6s!

I recommended frontal sacral, and sacral and pelvic balances to her all of which she had during the time she came to see me which was over a few months!

During the last session when doing resonance to her R ovary I could feel the sensation of a cold stone being released from the area of the ovary!

She fell pregnant a few weeks later had an easy pregnancy and now has a son!
