

Case 9 Hips Pain

AS female age 45 2013

Presented with chronic hip pain

Had been investigated and no physical abnormalities seen on X-rays . No arthritis or bone problems

Psychological influence : the pain started after she left her husband -she had worry and guilt as has abandoned her husband who has a chronic incurable physical illness

Essentially treatment involved resonance to areas of pain with one hand and yesod front and back with other hand . Chakra to pain area

She improved after first session treatment continued fortnightly for several months until she felt better and was no longer trouble by pain!
