

Case 6 MR snoring 2013

Male age 41!

Referred by wife as she can't sleep as he snores constantly

Asked him was it also his problem and he said yes . Also asked him was he here because of his wife or if he really wants to see me and he said yes he wants to see me and to have some treatment

Diagnosis blocked Chesed/geburah !

Emotionally stable personality appears in good spirits but tends constitutionally to be a worrier about getting things right and sometimes gets mild anxiety and depression!

He was very open to my treatments

Tx shentao geburah together

Then opened wrist gates in both sides P6 and TH 5

also Liv 3's !

Treated Chesed and heart!

I also opened ST 9's in the neck and St 36 and liver 3

After one session he improved a little. repeated a few more sessions weekly.

After 3 sessions his wife told him he hardly ever snores anymore
