

Case: 2 yr old girl - Toilet training accidents regularly.(poos)

The Person & Complaint:

This child is fine going to the toilet to do wees but every poo is done in her pants. She isn't upset by this as her mum just drops it into the toilet and cleans her up. But the mum can't see a way of this changing and is starting to get down at this.

The Energetic System

Base

Treatment - first session

Opened base - after chatting to the mum - I felt that the child might just not be able to feel her poo coming in the same way as her wees.

Base felt so tight to start off but moved into an expansive movement quickly.

How it was resolved

The mum was amazed that after this one session the little girl didn't poo in her pants any more.
